Priceville's 2nd Annual CHRISTMAS in the park

Tree Decorating Tips and Requirements
PLEASE READ CAREFULLY

We will have your beautiful 7' tree standing and awaiting decoration by 3 p.m. on Nov. 29th, 2021. All trees must be decorated by Dec. 8 and will be displayed until January 6, 2021.

ALL decorations must be removed by Jan 6th. This holiday event will offer great fun coming up with your own special theme and bringing family and friends to visit the park. Use your imagination and decorate your tree to represent your business, organization, or special theme! A "flyer box" may be posted beside your tree sign for public take-away flyers if you like.

Check-in

Each tree will have a tag with the sponsor number on it for easy location. You will receive your sponsor number by email by November 28th. If you have any problem finding your tree, please check in with: Katie England 256-740-2674 Signs will be placed after the tree is fully decorated.

Supplies

Decorations must be able to withstand the outdoor elements for a minimum of 30 days. Please make sure to use non-breakable ornaments made to be outside! (Bread or other material that can ruin in water is not recommended.)

* Any color ELECTRICAL lights may be used. This year we are installing electrical outlets around the park and we will set the trees on outdoor timers. No solar lights this year. We recommend 800-1000 lights per tree. The more lights, the brighter and merrier your tree will be! Zip-ties should be used to secure the lights to the tree.

* Zip-ties, pipe cleaners, or other light metal type ties should be used to secure your decorations. Ornament hooks will not keep your ornaments secure for 30 days. You may also want to secure ribbons and streamers in a manner that the wind will not blow them to one side of the tree.

* You may want to bring a step ladder to reach the upper branches. Trees are approximately 7 feet tall.

* ALL decorations and ties must be removed by Jan 6th in order to mulch the trees.

Decorating Tips

* Your decorations should be rain and wind tolerant. The decorated trees will be standing outside in the elements for over 30 days! Mark your calendar to be ready to remove all decorations after New Year's Day but before January 6th. Anything remaining on Jan. 6th will be discarded/donated

* Larger decorations are easier to see.

* Do NOT use water-soluble glue on ornaments or ornaments made with water-soluble glue. They will come apart in the rain.

* Do NOT use glass or fragile ornaments as they may break easily in the wind and rain.

* Do NOT use shredded tinsel or other small decorations that will blow off in the wind or be hard to clean

* Check your tree periodically throughout the event to ensure lights are working and decorations are secure.
